

## List of Poster Presentation (Industrial Safety) 40th DAE-SOHPM 2024

| S.N. | Paper ID | Paper Title                                                                                                                              | Author Name            |
|------|----------|------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| 1    | 60       | Safety Considerations in Processing and Assembly of SCRF Cavities for Performance Testing in Vertical Test Cryostat at 2K                | S Suhane               |
| 2    | 175      | SAFETY MANAGEMENT SYSTEM TO ACHIEVE ZERO HARM                                                                                            | N Kanagalakshmi        |
| 3    | 239      | OVERVIEW OF SAFETY ASPECTS OF HIGH ENERGY LASER SYSTEM AT RRCAT                                                                          | B Singh                |
| 4    | 77       | In-Cell EOT Crane Module Replacement in Nuclear Environment                                                                              | Sudhanshu Mishra       |
| 5    | 46       | CHALLENGES FACED & STRATEGIES IMPLEMENTED DURING ERECTION OF TRUSS & BRACING STRUCTURES OF RHIDS & SGIDS BUILDING AT IGCAR- A CASE STUDY | Venkatanarayana Paloji |
| 6    | 302      | Methodology for Computing Safety Score for Indus Accelerator Complex                                                                     | Haridas G              |
| 7    | 65       | TEN TENETS TO ATTAIN ZERO ACCIDENTS GOAL AT WORKPLACE                                                                                    | G.L.N. Padmavathi      |
| 8    | 85       | IMPLEMENTATION OF ZERO HARM STRATEGY IN WORKPLACE                                                                                        | R. Jayaraman           |
| 9    | 125      | IMPLEMENTATION OF SAFETY MEASURES IN SST-1 CRYOGENIC SYSTEMS AT IPR                                                                      | Rajiv Sharma           |
| 10   | 39       | Implementation of Online Safety Related Deficiency Reporting system in IGCAR to achieve zero harm                                        | Shiva Sai Prasada Gogu |
| 11   | 266      | SAFETY ASPECTS IN LASER CUTTING AND WELDING OPERATIONS AT NUCLEAR POWER PLANT SITES                                                      | M. K. Bairwa           |
| 12   | 167      | SAFETY SYSTEM OF HIGH VOLTAGE AREA                                                                                                       | N Goswami              |
| 13   | 84       | Fire Hazard and Safety Aspects in manufacturing of Zircaloy Tubes for Nuclear Reactors                                                   | Pranay Kumar Gupta     |
| 14   | 259      | SAFETY PROVISIONS IN INDUS ACCELERATOR COMPLEX AT RRCAT                                                                                  | Amit Chouhan           |
| 15   | 237      | Enhanced Safety Protocols for Pressurized Autoclaves in Alkali Leaching of Low-Grade Uranium Ore                                         | Vipin Kumar Sharma     |
| 16   | 132      | SAFETY PERFORMANCE ASSESSMENT AT NFC                                                                                                     | Subhakar Adusumilli    |
| 17   | 155      | EVIDENCE-BASED PROCESS SAFETY MANAGEMENT AT CHLORINATION FACILITY                                                                        | Pandarinath D          |
| 18   | 174      | Personnel Safety System for Electron Beam Radiation Processing facility                                                                  | Lalita Jain            |
| 19   | 179      | UPGRADATION OF RF SYSTEM AND MACHINE PROTECTION IN INDUS-1 SRS                                                                           | Nitesh Mishra          |
| 20   | 161      | HOLISTIC SAFETY INTEGRATION IN THE DESIGN OF SPECIAL PURPOSE MACHINES                                                                    | B V Arun Kiran         |
| 21   | 215      | Safety aspects of pulse power supplies In Indus accelerator                                                                              | L Srinivas             |
| 22   | 45       | SAFETY MEASURES ADOPTED DURING REFURBISHMENT OF RESIDENTIAL QUARTERS AT GSO, KALPAKKAM                                                   | K V Sajunath           |
| 23   | 304      | CRITICAL ANALYSIS OF FIRE PROTECTION SYSTEMS IN A TYPICAL DATA CENTRE IN LIGHT OF INDIAN PERSPECTIVES                                    | Prateek Bhatnagar      |
| 24   | 51       | APPLICATION OF BLASTING NEAR NFOPS                                                                                                       | Prateek Saxena         |

|    |     |                                                                                                                                                                             |                         |
|----|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| 25 | 301 | DEVELOPMENT OF LOW DOSE RATE MEASUREMENT SYSTEM FOR IONIZATION CHAMBER BASED RADIATION MONITOR                                                                              | Karan Makwana           |
| 26 | 62  | METHODOLOGY OF HAZARD IDENTIFICATION AND RISK ASSESSMENT ACCEPTABLE TO REGULATORY BODY FOR RADIOCHEMICAL PLANT TO ACHIEVE ZERO HARM                                         | S. P. Lokeswar          |
| 27 | 173 | RF & MW SAFETY AT RADIATION FACILITIES OF RRCAT                                                                                                                             | M K Nayak               |
| 28 | 184 | FIRE HAZARDS ANALYSIS COMPRISING FIRE LOAD DENSITY ESTIMATION AND SMOKE FILLING TIME CALCULATIONS                                                                           | Ajay Kumar              |
| 29 | 238 | Quality Control measures of Radiation Monitoring System of Indus Accelerator Complex                                                                                        | Ram Bahadur             |
| 30 | 202 | PROCEDURE FOR DISMANTLING STRUCTURAL STEEL FRAME SUPPORTED STACK EXPOSED TO HIGH CORROSIVE ATMOSPHERE IN PYROPHORIC MATERIAL HANDLING CHEMICAL PLANTS – SAFETY REQUIREMENTS | A Anil Karunakar        |
| 31 | 76  | Safety Induction Training and Pass Management System                                                                                                                        | I.Gowtham               |
| 32 | 194 | RRCAT TECHNICAL AREA FIRE HYDRANT SYSTEM                                                                                                                                    | S S Parihar             |
| 33 | 300 | Personnel safety in operation of Petawatt laser facility at RRCAT                                                                                                           | M Tayyab                |
| 34 | 130 | Near Miss Incident Management– Aim towards zero harm                                                                                                                        | Nitin Choghule          |
| 35 | 244 | EVALUATION OF BEAMLIN SAFETY USING FAULT TREE ANALYSIS                                                                                                                      | Sanjiv Kane             |
| 36 | 218 | FIRE HAZARD ANALYSIS OF SCC BUILDING, VECC, KOLKATA                                                                                                                         | R Pandit                |
| 37 | 267 | Interlock System for Safe Operation of Industrial LINAC facility                                                                                                            | M Seema                 |
| 38 | 154 | ROLE OF POWER DISTRIBUTION IN ECONOMIC AND SAFE OPERATION OF FUEL PRODUCTION FACILITIES AT NFC HYDERABAD                                                                    | D Shreedhar             |
| 39 | 241 | UPGRADATION OF PERSONNEL SAFETY SYSTEM FOR INDUS-2 SYNCHROTRON BEAMLINES                                                                                                    | Chander Kant            |
| 40 | 228 | Implementation of Fire Hazard Analysis (FHA) and providing Fire dampers at DFRP AND OTHER Reprocessing Facilities                                                           | R Gopalakrishnana       |
| 41 | 264 | Study and Implementation of Polyacrylonitrile in Soil to Reduce the Earthing Resistance                                                                                     | Subhash Kesharwani      |
| 42 | 164 | A CASE STUDY ON LEAKAGE OF AMMONIA AT AMMONIA YARD NUCLEAR FUEL COMPLEX                                                                                                     | Surya Prakash           |
| 43 | 172 | EVALUATION OF OZONE CONCENTRATION FOR POLYCHROMATIC BEAMLINES OF INDUS-2                                                                                                    | Bhanu Singh Thakur      |
| 44 | 282 | Enhancing Safety in HV/EHV Electrical Substations: A Comprehensive Approach                                                                                                 | Swarnim Sharma          |
| 45 | 268 | SAFETY ASPECTS IN HIGH POWER Nd:YAG LASER OPERATION FOR MATERIAL PROCESSING APPLICATIONS                                                                                    | Vijay Shukla            |
| 46 | 78  | Safe Industrial Culture: An Ongoing Process for Achieving Zero Harm at PPRDF, IGCAR, Kalpakkam                                                                              | S Suresh                |
| 47 | 182 | Fire Detection & Alarm Systems at RRCAT                                                                                                                                     | Shailendra Kumar Shukla |
